

**PRETIUM  
TRAINING**

Setting the Standards

The **FTACC** course is provided exclusively by **The ATACC Group**

# FTACC

## First Aid Trauma & Casualty Care

**FTACC, the ground-breaking approach to first aid training, designed to be more exciting and stimulating than traditional methods.**

### COURSE AIM

The aims of this course are well defined by the Health and Safety executive. It will;

- Inform the candidates about current Health and Safety regulations and how it impacts them at work.
- Ensure that candidates can make an emergency call and know how to interact with the emergency services and prepare for their arrival.
- Deliver practical and effective first aid.

**FTACC** is part of our **Integrated Emergency Care Programme (IECP)** developed by the world renowned ATACC Faculty.

# FTACC is redefining the very DNA of the First Aid at Work (FAW) training.

The FTACC course has been written as a fresh new approach to first aid following the de-regulation of First Aid at work by the UK Health & Safety Executive (HSE). By avoiding unnecessary jargon and technical information, the course focusses on what really matters to help the casualty in a wide range of typical first aid situations.

The standard A.B.C process of assessment has been replaced with the new **B.U.R.P.S algorithm** developed by leading emergency & pre-hospital care doctors as a significant improvement for the identification of patient conditions.

- **FTACC meets the standard defined by the Faculty of Pre-hospital Care for B level providers.**
- **New B.U.R.P.S algorithm, designed to responsively identify a patients condition.**
- **Structured, supportive pathway allowing continued professional development.**
- **Adopted by numerous UK Emergency Services.**
- **Approved & Accredited by the ATACC faculty.**
- **Dynamic classroom sessions supported with practical learning.**
- **Structured, supportive pathway allowing continued professional development.**
- **Cost effective.**
- **Reduces Corporate Risk**

FTACC meets and exceeds the specified guidelines set by the Health & Safety Executive (HSE). Our realistic, engaging training methods will ensure increased information retention and confidence to deliver skills when they are needed most.

The HSE requires all organisations to complete a work based risk assessment in order to categorise the level of hazard associated with your work activity. **Low hazard e.g. Office staff, retail etc. will benefit from FTACC training.**

Organisations who identify a higher-level hazard/risk should consider our BTACC or RTACC training.

Our First Aid course isn't an annual tick box exercise but a focused approach to training which empowers individuals to be effective and feel confident when using their skills.

All courses can be delivered either in house, or upon request at our Progressive, Immersive Training & Resuscitation Academy (**PITRA**) centre in Manchester.

# FTACC – Course Information.

## COURSE SUMMARY

**FTACC offers a brand new and ground breaking approach to first aid training. Whilst the key elements are unchanged, how we deliver the training, reinforce it and keep the candidates engaged is where we have made considerable progress.**

This course has been well established within the UK Emergency service staff and receives excellent feedback. First aid is no longer simply an annual tick-box exercise but focussed training that empowers individuals to feel confident and effective in delivering first aid.

FTACC meets the standard defined by the Faculty of **Pre-hospital Care for B Level providers.**

## COURSE REQUIREMENTS

**Candidates must be at least 16 years of age.**

## COURSE CONTENT

- Safety
- Calling for Help
- Immediate Assessment – BURPS
- Bleeding – BURPS
- Major Bleeding – BURPS
- No Signs of Life
- Unconscious / Very Drowsy
- Respiratory Distress – BURPS
- Pain or Numbness – BURPS
- Skin – Appearance & Temperature – BURPS
- Special Circumstances

All courses can be delivered either in house, or upon request at our Progressive, Immersive Training & Resuscitation Academy (**PITRA**) centre in Manchester.
